

## SEEDING UNIT

With a seeding unit, the variety of your product range can be significantly extended. Therefore we've given our seeding unit a facelift and developed an "all-around talent" that offers easy operation while setting the standard in hygienic design and can be combined with various Koenig lines.

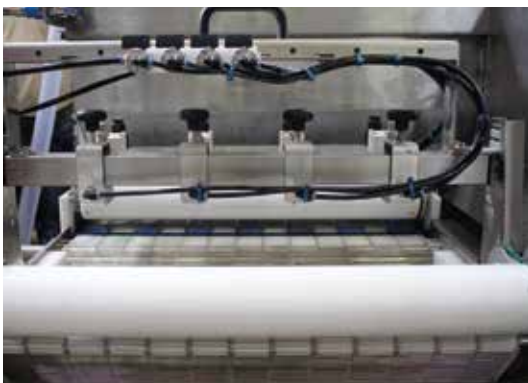

### MAIN FEATURES

- available in working widths 600 or 800mm
- wire belt module on a mobile frame
- easy cleaning due to optimized accessibility of all parts which are in touch with dough
- wire belt module exchangeable with an optional conveyor belt (also on a mobile frame)
- seeding material can be recycled manually or with an automatic seeding material reclaimer

- available with one seeding box for seeding from above or with two seeding boxes for seeding from both sides
- water application with water bath and/or spraying unit
